

LIGHT DUTY TRIPOD

Precision

ULTRA-PORTABLE PRECISION SUPPORT PLATFORM ENGINEERED FOR RAPID TACTICAL SETUP AND STABLE OBSERVATION IN UNDER 60 SECONDS.

Electro-Optic

Infantry
Weapon

OUR USP'S

- Rapid setup allows for a stable and operational platform in under 60 seconds, supporting high-tempo relocation requirements for dismounted soldiers.
- Elite weight-to-performance ratio provides maximum stability for aiming devices and light optics while maintaining a minimal load for man-portable missions.
- Tactical low-profile design features a non-reflective stealth finish to minimize visual signature and maintain concealment during covert perimeter surveillance.
- Integrated rapid-fold geometry enables immediate breakdown and transport, allowing teams to clear a position quickly following the completion of an objective.

SALIENT FEATURES

- Ground-gripping tactical spike feet ensure a high-friction "bite" on soft soil, sand, or uneven debris, preventing platform shift during long-range observation.
- Integrated 360° manual pan-tilt head provides smooth, friction-controlled directional adjustments for high-accuracy aiming of lightweight electro-optics and sensors.
- High-tension positive locking collars prevent leg slippage and maintain a perfectly level payload even under maximum load in challenging environments.
- Universal modular top-head interface supports the rapid integration of diverse tactical equipment including lighting, jammers, and small RF antenna arrays.
